Broncocure®

Liquid expectorant in drinking water

For Veterinary Use Only

Composition

Each liter of solution contains:

- Guaifenesin 128 g
- Eucalyptus oil 10 g
- Menthol 10 g

Target Animal Poultry

Indication

Broncocure® is for use in the drinking water of poultry to reduce respiratory congestion caused by mucus.

Dosage and Administration

Mix Broncocure® into the drinking water at 100 ml for each 1000 Kg of bodyweight in 24 hours (Depending on weight of poultry and farm density, 500-1000 ml Broncocure® /1000 liters of drinking water)

Note:

- Treatment could be repeated for 3-4 days as required. Use as the sole source of drinking water.
- Prepare fresh solution daily.
- Duration and dosage should be prescribed by a veterinarian.

Contraindication

None.

Withdrawal period

None.

Storage

- Keep it in room temperature and away from direct sunlight.
- Storage at temperatures below 4 °C may cause precipitation of active ingredients.
- Keep the lid of container closed.

Precaution

Keep out of reach of children.

Packaging

1 Liter Bottle
