Myconiq®
Mineral-Organic Toxin Binder, Feed Additive Powder
For Veterinary Use Only

Composition

- Hydrated Sodium Calcium Alumino-Silicate (HSCAS)
- Activated Carbon

Target Animal

Livestock and Poultry

Indication

Myconiq® is used in feed ingredients and complete feed in order to absorb and reduce the amounts of mycotoxins in animal feed.

Dosage and administration

- Poultry: 1-3 Kg per MT of complete feed and raw materials.
- Cattle: 50 g/Head/Day

Note:

- Myconiq® is added directly into the feed when mixing.
- The dosage depends on the level of mycotoxin concentration in feed, and a veterinarian or nutritionist's recommendation.

Contraindication

None.

Withdrawal period

None.

Storage

- Keep it in room temperature and away from direct sunlight.
- Keep the lid of the container closed.

Precaution

- Use under supervision of a veterinarian.
- Keep out of reach of children.

Packaging

25 kg 4-layer bags
