Pyrocure®

Analgesic, Anti-inflammation and Antipyretic Solution For Veterinary Use Only

Composition Each liter of solution contains: Sodium salicylate 486 g

Target Animal Poultry

Indication Pyrocure® is used in poultry drinking water to reduce pain, fever and inflammation.

Dosage and Administration

Analgesic and Antipyretic:

Depending on weight of poultry and farm density, mix 52 ml of Pyrocure® / 1000 Kg of BW into the drinking water daily (to provide the target dose of 25 mg sodium salicylate / Kg BW).

Anti-inflammatory/ Anti-prostaglandin Effect:

- First day of treatment - Mix 104 ml of Pyrocure® / 1000 Kg of BW into the drinking water daily (to provide the target dose of 50 mg sodium salicylate / Kg BW).
- Following days of treatment - Mix 65 ml of Pyrocure® / 1000 Kg of BW into the drinking water daily (to provide the target dose of 35 mg sodium salicylate / Kg BW).

Note:

- Repeat as necessary.
- Prepare fresh solution daily.
- Duration and dosage should be prescribed by a veterinarian.

Contraindication

None.

Withdrawal period
